8 Weeks beginning Tuesday Mar 8, 3:00 – 4:00pm
Spring Session Dates: Apr 5, 12, 19, 26, May 3, 10, 17, 24

Why should students play Chess?

Chess is a fascinating game, which can be played and enjoyed at all levels. Educational research indicates evidence of a strong positive correlation between chess and student academic performance. Multiple studies have shown that learning chess throughout the school years improves competence in mathematics and other cognitive development. The educational research is conclusive: **Chess Makes Kids Smart!** The practical application of the skills learned while playing chess are the same skills necessary for academic excellence and lifelong success:

- | | | | |
|--------------------------|----------------------------|--------------------|---------------------------------|
